Professional Profile

I am a Fullstack Developer with over 5 years of experience, specialized in creating scalable and responsive web applications. I have strong expertise in both frontend and backend technologies, having worked in various sectors, including financial services. My main skills are in Angular, Node.js, and NestJS, and I am passionate about optimizing user experiences through modern web technologies. I am also interested in working abroad and relocate to any country.

Professional Experience

Digital Factory - Falabella Financiero
